MANAGEMENT DISCUSSION & ANALYSIS REPORT**OVERALL REVIEW**

India is one of the fastest growing and largest television markets in the world. The increasing rate of urbanization, penetration of television with the help of technology and the rising levels of income of people of India have facilitated the growth of this Industry. The Company was also successful in its dedicated and result oriented efforts to maintain its market share and income from operations as in last year.

CATV is well penetrated, particularly in urban regions. Media Partners Asia (MPA) 2013 estimates, that the total universe of TV Households in India will grow to 205 Million in 2020. Cable will continue to be a significant proportion of this universe and is expected to grow from 97 Million TVHH in 2012 to 106 Million TVHH in 2020. While the growth of the cable universe is modest, the real opportunity lies in the implementation of mandatory Digital Addressable Systems (DAS) consequent to the enactment of the Cable Television Networks (Regulation) Amendment Act, 2011.

OPPORTUNITIES, THREATS AND BUSINESS OUTLOOK

Renewed economic dynamism and multi-platform competition have paced the usage of pay-TV and broadband in Asia Pacific. Now home networks are bringing content to a new range of devices, including mobile devices and digital video recorders (DVRs), as well as to multiple TV sets. With the rise of Direct to Home (DTH) operators, HITS and IPTV in the Indian Market, satellite TV is having major impact on their market share. In view of the above, your Company has already digitalise the total network as per TRAI regulation by installing 100% Set Top Box (STB's) and is doing well in countering the threat of DTH through STB's.

Our early focus has been on digitally enabling our universe of subscribers in the Phase I and Phase II cities that we serve. This has involved partnering with our Local Cable Operators / Distributors in adequately seeding Set Top Boxes (STBs), establishing back end infrastructure such as Digital Head-ends, Subscriber Management Systems (SMS), Conditional Access Systems (CAS) and Customer Contact Centers that are commensurate with the scaling up of operations.

RISKS AND CONCERNS

Looking at the competition in the DTH space and the rapid technological changes in the industry, your Company may be required to constantly upgrade its infrastructure, which will entail substantial capital expenditure. Further, the Government may regulate the CATV rates.

HATHWAY BHAWANI CABLETEL & DATACOM LIMITED

However, the Company is fully geared up to take on any technological change in the industry. The Company is taking various steps for reducing operating cost and other expenses by:

- a) Improving efficiency through innovative solutions
- b) Curtailing overheads by exercising strict control and regular review mechanism.
- c) Stringent control procedures for fast recoveries.
- d) Retiring off expensive loans.

INTERNAL CONTROL SYSTEMS AND ADEQUACY

The Company has proper and adequate internal control system under which management reports on key performance indicators and variance analysis are made. Regular Management committee meetings are held where these reports and variance analysis are discussed and action plan initiated with proper follow up. Operational Reports are tabled at Board Meetings after being discussed in Audit Committee meetings.

SEGMENT-WISE OR PRODUCT WISE PERFORMANCE

The Company operates in a single segment viz. CATV. The reason being CATV & ISP services are provided by using same, common infrastructure. CATV Business comprises of receiving, distributing and transmitting satellite channel programs and ISP Business comprises providing internet services through Cable. Considering the recent business developments and changes that have taken place over the years concerning returns and risks involved in these two activities, the entire business has been considered as one primary segment as per the provisions of Accounting Standard 17. The Company operates within the geographical limits of India and accordingly secondary segments have not been considered.

HUMAN RESOURCES

An Orientation has been given to the personnel policy with emphasis on performance. Employee strength was increased at various levels with reallocation of responsibilities for better utilization of resources.

Measures are continuing to facilitate higher levels of output and productivity. Managerial Effectiveness is being improved by appropriate development and training programs, better co-ordination and improvement in communications.

Hence, they are excluded from revenue.

12 Taxes on income

- (a) Provision for Current Tax is made on the basis of taxable profits computed for the current accounting period (reporting period) in accordance with the Income Tax Act, 1961.
- (b) Deferred Tax is calculated at the tax rates and laws that have been enacted or substantively enacted as of the Balance Sheet date and is recognized on timing difference that originate in one period and are capable of reversal in one or more subsequent periods. Other deferred tax assets are recognised only to the extent that there is a reasonable certainty of realisation in future.
- (c) 'Minimum Alternate Tax (MAT) credit is recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. The said asset is created by way of a credit to the profit and loss account and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the

effect that Company will pay normal Income Tax during the specified period. Tax on distributed profits payable in accordance with the provisions of section 115 O of the Income Tax Act, 1961 is, in accordance with the Guidance Note on Accounting for Corporate Dividend Tax, regarded as a tax on distribution of profits and is not considered in determination of the profits for the year.'

The Company assesses at each balance sheet whether there is any indication that assets may be impaired. If any such indications exist, the Company estimates the recoverable amount of the assets or the cash-generating unit and if the same is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the profit and loss account. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the assets are reflected at the recoverable amount.

14 Cash & Cash Equivalent

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank, cash in hand, demand deposits with banks and other short-term investments with an original maturity of three months or less.

15 Earnings Per Share

- a) Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.
- b) For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

16 Measurement of EBITDA

As permitted by the Guidance Note on the Revised Schedule VI to the Companies Act, 1956, the company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the statement of profit and loss. The company measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the company does not include depreciation and amortization expense, finance costs and tax expense.

(c) Sale of Goods

Revenue from sale of Access Devices is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods. The Company collects sales taxes and value added taxes (VAT) on behalf of the Government and, therefore, these are not economic benefits flowing to the Company. Hence, they are excluded from revenue.

13 Taxes on income

- a) Provision for Current Tax is made on the basis of taxable profits computed for the current accounting period (reporting period) in accordance with the Income Tax Act, 1961.
- b) Deferred Tax is calculated at the tax rates and laws that have been enacted or substantively enacted as of the Balance Sheet date and is recognized on timing difference that originate in one period and are capable of reversal in one or more subsequent periods. Deferred Tax assets are recognised on carry forward of unabsorbed depreciation and tax losses only if there is virtual certainty that such deferred tax assets can be realized against future taxable income. Other deferred tax assets are recognised only to the extent that there is a reasonable certainty of realisation in future.
- c) 'Minimum Alternate Tax (MAT) credit is recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. The said asset is created

by way of a credit to the profit and loss account and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal Income Tax during the specified period. Tax on distributed profits payable in accordance with the provisions of section 115 O of the Income Tax Act, 1961 is, in accordance with the Guidance Note on Accounting for Corporate Dividend Tax, regarded as a tax on distribution of profits and is not considered in determination of the profits for the year.'

14 Impairments

The Company assesses at each balance sheet whether there is any indication that assets may be impaired. If any such indications exist, the Company estimates the recoverable amount of the assets or the cash-generating unit and if the same is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the profit and loss account. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the assets are reflected at the recoverable amount.

15 Cash & Cash Equivalent

Cash and cash equivalents for the purposes of cash flow statement comprise cash at bank, cash in hand, demand deposits with banks and other short-term investments with an original maturity of three months or less.

16 Earning Per Share

- a) Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.
- b) For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

17 Measurement of EBITDA

As permitted by the Guidance Note on the Revised Schedule VI to the Companies Act, 1956, the company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the statement of profit and loss. The company measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the company does not include depreciation and amortization expense, finance costs and tax expense.
